- 10:50** **Parks & Recreation** (Joe Lovell): Parks spatial inventory and the ParkArt Series Maps
- 11:00** **Public Works** (John Lautenschlager): Range Points
- 11:15** Cake and raffle!

Ever wonder how the City and County of Denver develops the maps used to provide essential services to residents and support large events happening around town? Come to this year’s GIS Day and find out!

Many of the twenty five City agencies that use Geographic Information Systems technology for data analysis and map creation will unite for an exhibit on the innovative ways GIS is used by City government. Various maps will be on display all week in the Map Gallery, including maps created to analyze crime data, plow streets and study water quality. Other displays will focus on planning, logistical, and tactical maps used for situational analysis during the Democratic National Convention.

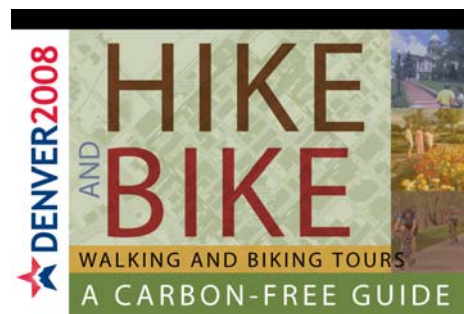

On Wednesday morning, November 19th, staff will be on site to present their maps and answer questions. Come by to enter the raffle, have some cake and pick up your free copy of the Hike and Bike Guide created for the DNC (while supplies last).

GIS Day is a global event that celebrates geography and the application of geographic information systems (GIS) technology. A geographic information system (GIS) uses computers and software to analyze and map location-based information.

Free Hike and Bike Maps!

Cake!

Raffle for cool GIS prizes!

Presenters will be available until noon to answer questions
