

City and County of Denver

Technology Services Program Management Office

2010 Project/Program Overview

Denver Access and Video Enhancements RFP

Description: This project is a Request For Proposal generation project to select the best value vendor to provide turn-key solutions for video and access control implementations for the City and County of Denver. The selected vendor will collect requirements, design, develop and install video and access control solutions for all agencies with requirements for this service. All vendor designed and delivered solutions will meet the established Technology Services standards for video and access control.

Benefits & Opportunities: Provides agencies requiring video and access control a single point of service to meet their video and access control needs. Relieves the Technology Services staff from the necessity of designing, implementing and maintaining systems not within their core service capabilities.

Requesting Agency: Technology Services

Type: service improvement
