

City and County of Denver

Technology Services Program Management Office

2010 Project/Program Overview

Peoplesoft Upgrade Program

Description: This program is an effort to enable significant functional additions to the Peoplesoft Suite to provide more automation for both the financial and HR functions management for the City and County of Denver. The program consists of four main projects:

- EPerformance
- Purchase to Pay
- Open Ranges
- Concurrent Dates

Benefits & Opportunities: Provides automation of the Performance Rating function for the Human Resources function, as well as automating the rescheduling of due dates to a consistent time. The project provides the City and County the ability to set pay for an individual within an open range for each job classification rather than a specific step. The project provides the functionality to track purchases in an automated fashion from initial PO generation to payment generation and back-end accounting.

Requesting Agency: CSA and Treasury/Controller's Office

Type: service improvement
