

City and County of Denver

Technology Services Program Management Office

2010 Project/Program Overview

eForeclosure Project

Description: This project will provide a web application to allow citizens to access Foreclosure data on properties within the City and County of Denver. The application is intended to increase the amount of foreclosure information and ease of access to that information for the citizen.

Benefits & Opportunities: Allows those interested in foreclosure information easy access to the data and provides a web based application to facilitate that data access.

Requesting Agency: Clerk and Recorder's Office

Type: service improvement
