

Linkage to HIV Services

A guide for getting connected to HIV services in Metro Denver.

Dear Community,

Did you know that recently, there was an **increase in newly diagnosed cases of HIV in Colorado**? We have the resources in Colorado to eliminate HIV but need your help to provide people living with or at risk of HIV access to quality care and medications.

We hope the resources in this brochure will address your needs or the needs of those you care for.

Help us improve the lives of people living with or at risk of HIV. Everyone's involvement is critical to achieve our goals.

Sincerely,

The Fast Track Cities 5280 Task Force

PrEP

What is PrEP? PrEP is a once-a-day HIV prevention pill for people who are HIV-negative. If taken as prescribed, PrEP is over 90% effective in preventing HIV.

Cost: There are great financial assistance programs available to help lower the cost of PrEP.
