*As with all design and construction projects schedule indicated above is an estimate only. Many factors can cause delays in the delivery of the project, and schedules are subject to change.

Brief project description

Thanks to voter-approved Legacy Funds, installation of new piping from Ferril Lake will connect to a new pump station inside the DPR maintenance facility at 2100 Steele St. The upgrade to the irrigation water delivery will allow for higher capacity nighttime watering of the park and greatly reducing the need for daytime watering. Construction will last throughout 2024.
