

Skyline Park Improvements Project

Skyline Park will be an authentic and contemporary expression of Denver's urban outdoor lifestyle.

Located between 15th and 18th Streets along Arapahoe Street, Skyline Park is at the heart of Denver's downtown. This project will adapt this critical park space for a new era of more accessible and vibrant experiences for residents, workers, students, and visitors.

Project Status | Block 2 Design (2022 - 2024)

Denver Parks & Recreation (DPR) has kicked off a detailed design for the first phase of implementation of the Skyline Park project: Block 2 (between the 16th Street Mall and 17th Street). The middle of the overall 3-block Skyline Park, Block 2 is designed to energize downtown with state-of-the-art amenities that will improve experiences for residents, tourists, workers, students, and regional visitors, while also infusing life into downtown Denver. The Block 2 design includes a winter ice-skating rink and loop, which converts to an interactive water play area and flexible summer event plaza. Block 2 will also feature a year-round food and beverage pavilion, more shady trees and green infrastructure, and an enhanced bike lane connecting to key downtown destinations. The existing Halprin sculpture will remain, reimagined as a vibrant educational garden using best practices for urban ecology.
