*As with all design and construction projects schedule indicated above is an estimate only. Many factors can cause delays in the delivery of the project, and schedules are subject to change.

Brief project description

This project is a partnership with Denver Water and the Colorado Water Conservation Board aimed at adapting the City and County of Denver parks system to a changing climate. This project will transform 10 acres of water-intensive, non-functional bluegrass in the Central Park Neighborhood, to a native prairie landscape.
