

**Grease Interceptor Owner Risk Acknowledgement  
(Core/Shell, Landord Improvements, or Superstructure)**

SUDP Number: \_\_\_\_\_ - SUDP - \_\_\_\_\_

Wastewater criteria on sizing grease interceptors differs and is more conservative than the IPC. This letter from the developer/owner acknowledges that once a tenant or tenants have been chosen a larger or additional grease interceptor(s) could be required and would have to be installed following Wastewater Standard detail for size and design (concrete gravity grease interceptor). Proprietary interceptors or alternate sizing criteria will only be considered under a variance process with documented hardship.

For Consideration Only: Recent required sizes based upon DOTI Wastewater criteria for tenant finishes has required 1500 gallon to 2000 gallons per restaurant tenant. Sizing guidelines and standard details can be found under Standards and Details on our web page [www.denvergov.org/sudp](http://www.denvergov.org/sudp).

_____ Name of Developer, Company, or Owner	_____ Date
_____ Authorized Signature	_____ Title

Submit the completed form via: [E-Permits](#)  
\*Include the Sewer Use and Drainage number associated with the project.
