

## Future Owner Notification Letter for Groundwater Dewatering System and Discharge

**SUDP Number:** \_\_\_\_\_ - **SUDP -** \_\_\_\_\_

This site (**insert building(s) address(es)**) \_\_\_\_\_ is in or near the groundwater table level. A plan and system to address the discharge of groundwater and maintain the discharge on-site and not flow into the public right of way or adjacent properties has been designed and installed per the attached and recorded Groundwater Dewatering Management Plan (GWMP). Failure to maintain the installed system as stated in the attached recorded GWMP and described below will require a new groundwater dewatering system to be designed, reviewed, permit obtained, and system installed and inspected.

**The Groundwater Dewatering System consists of:** (In the box below, describe all elements of the GWMP including location of all sump pumps, pipe size and material, and discharge point(s) (examples: sump pump with battery backup located in the basement is connecting to 4” pipe that discharges to a drywell located between the back of house and detached garage)
