*As with all design and construction projects schedule indicated above is an estimate only. Many factors can cause delays in the delivery of the project, and schedules are subject to change.

Brief project description

This is a developer-led project in Central Park. This park will feature natural berms, connections to existing open space pathways, an open bluegrass lawn, a pump track, and a playground. The play area will integrate "nature play" and the pump track will be for all ages.

New pump track - Opening date based on native seed establishment

New nature play area is open to the public
