

Office of Human Resources
Data Analytics Associate – LD3331

THIS IS A PUBLIC DOCUMENT

General Statement of Duties

Performs intermediate professional data analytics and statistical modeling on existing data sets in multiple areas of the business and fulfilling data requests.

Distinguishing Characteristics

The Data Analytics Associate is distinguished from the Data Analytics Staff, which performs entry level professional analytic and statistical modeling on existing data sets in multiple areas of the business providing data analytics and fulfilling data requests.

The Data Analytics Associate is distinguished from the Data Analytics Senior, which performs full performance level data analytic work fulfilling data requests and performing advanced level of data analytics and data modeling for the needs of the Department/Agency.

The Data Analytics Associate is distinguished from the Data Analytics Lead, which performs lead level work over professional data analysts engaged in providing analytical assessment and evaluations of local government functions and activities by providing analytical and methodological support to the Department/Agency.

The Data Analytics Associate is distinguished from the Data Analytics Specialist, which performs specialized, professional level data analyst work that requires application of a unique or specialized knowledge or skillset outside of data science engaged in analytical assessments and evaluations of local government functions and activities by providing analytical and methodological support to the Department/ Agency.

The Data Analytics Associate is distinguished from the Data Analytics Supervisor, which supervises professional data analytics staff engaged in providing analytical assessments and evaluations of local government functions, provides and oversees analytical and methodological support to the Department/Agency.

Essential Duties

Identifies and applies analytic knowledge and ideas to stakeholders, management, and other organizations in collaboration with department/agency team(s) to meet objectives, reduce risk, and improve efficiency and effectiveness.

Advocates for data usage by explaining usage of analytics through formal and informal means.

Addresses the department/agency's data needs on engagements, controls, monitoring, and auditing.

Applies statistical knowledge and understanding, defines data requirements, and extracts data from key business systems using Tableau, Arbutus, STATA, and Python. Prepare, transform, analyze, visualize, and dashboard data.

Examines, identifies, and provides advice on data patterns and trends to help answer business questions and improve decision making. Identifies areas to increase efficiency and automation of data analysis processes.

Provides department/agency teams with methodological assistance with the use of data science tools to complete data analytics.

Creates workpapers with clear explanation of methodology and conclusion to support department/agency engagements.

Provides advice and support to department/agency teams in cleaning, reviewing, validating, manipulating, modeling and analyzing data.

By position, these engagements include, but are not limited to, assessing the effectiveness, efficiency, public policy assessment, governance, internal control, and compliance objectives as defined by Generally Accepted Government Auditing Standards (GAGAS) promulgated by the U.S. Government Accountability Office (GAO), if applicable.

Performs other related duties as assigned.

Employees may be re-deployed to work in other capacities in their own agencies or in other City agencies to support core functions of the City during a City-wide emergency declared by the Mayor.

Any one position may not include all of the duties listed. However, the allocation of positions will be determined by the amount of time spent in performing the essential duties listed above.

Competencies

Attention to Detail – Is thorough when performing work and conscientious about attending to detail.

Decision Making – Specifies goals and obstacles to achieving those goals, generates alternatives, considers risks, and evaluates and chooses the best alternative in order to make a determination, draw conclusions, or solve a problem.

Mathematical Reasoning – Solves practical problems by choosing appropriately from a variety of mathematical and statistical techniques.

Oral Communication – Expresses information to individuals or groups effectively; taking into account the audience and nature of the information; makes clear and convincing oral presentations; listens to others, attends to nonverbal cues and responds appropriately.

Reasoning – Identifies rules, principles, or relationships that explain facts, data, or other information; analyzes information and makes correct inferences or draws accurate conclusions.

Writing – Writes in a clear, concise, organized, and convincing manner for the intended audience.
