\*As with all design and construction projects schedule indicated above is an estimate only. Many factors can cause delays in the delivery of the project, and schedules are subject to change.

### Brief project description

The City & County Building Landscape Transformation Project will convert the existing non-functional bluegrass turf around the building to a diverse prairie consisting primarily of native grasses and wildflowers. The project will replace the existing irrigation with a more efficient system to support the establishment of the native landscape while conserving water.
