

Office of Human Resources
Infrastructure Program Manager – CE3256
THIS IS A PUBLIC DOCUMENT

General Statement of Duties

Performs full performance professional level work by leading a multi-disciplinary capital infrastructure program or initiatives that requires an understanding of City and partner agencies, policies, standards, and systems. They are responsible and accountable for the coordinated program management of multiple, related projects directed toward strategic business and organizational objectives.

Distinguishing Characteristics

The Infrastructure Program Manager is distinguished from the Infrastructure Program Manager Senior which leads complex, multi-disciplinary capital infrastructure programs or initiatives that have regional and city-wide impact and requires a strategic understanding of City and partner agencies, policies, standards, and systems. Oversees multiple interconnected projects that advance strategic organizational objectives, while coordinating cross-functional teams of city staff and external consultants. Responsible for program strategy development, stakeholder management, and ensuring alignment with city-wide goals. Reports to a Program Director or Executive Leadership, with accountability for program performance and strategic outcomes all managed initiatives.

The Infrastructure Program Manager may implement existing programs under senior leadership guidance whereas an Infrastructure Program Manager Senior would independently develop program strategies, handle complex delivery methods, and influence organizational policies and procedures while managing diverse multi-agency stakeholders.

The Infrastructure Program Manager series is distinguished from the Project Manager series because program managers ensure organizational alignment and preside over the strategy, coordination, and successful delivery of desired benefits. These benefits are achieved through multiple related projects or other activities, each of which is delivered by an individual in the Project Manager series. Infrastructure Program Managers coordinate, plan, and oversee the successful completion of a program and the various program lifecycle activities to deliver benefits to the organization. In contrast to the Program Manager series, the Project Manager series manages projects that typically have a single deliverable, with a finite end term (typically shorter duration <3 years, lesser dollar amount ~<\$100M, and a singular product/location) regardless of the breakdown of multiple work packages required to support an alternative delivery method or the presence of multiple funding sources.

Program Management entails managing a program with multiple, related program lifecycle activities that are necessary to reach programmatic benefits. A Program is typically a large, coordinated portfolio of a given work product and or asset that relates to each other, supports programmatic goals, and combines individual project management with a master planning component of delivery. A Program usually has an additional contract management and organization structure such as an external program management consultant or owner's representative.

Essential Duties

Establishes and oversees program governance structure while developing and executing benefit realization and stakeholder management plans.

Manages program financial health for program planning, design, regulatory, and/or construction phases, recommend project budget needs for annual appropriations, and ensure program deliverables stay on- time, on-target, and on-budget.

Develops program baseline budgets, schedules, work plans, and cost estimates/projections to identify cost savings and develop program management plans including time frames, funding limitations, contract costs, risk factors, staffing requirements, and allotment of available resources to various phases of a program.

Manages program resources and advise on program management issues including refining program, setting priorities, developing delivery strategies, implementing business processes and procedures, and addressing areas of concern.

Evaluates and implements project delivery strategies using traditional and alternative delivery models.

Administer and monitor contracts, including contract negotiation and preparation of contract recommendations; and monitor project portfolios for conformance to approved plans and contract specifications.

Oversees the work of engineers, architects, technical support staff, consultants, contractors, and related personnel assigned responsibility for various projects and/or portions of a project within a program to ensure alignment with program goals and objectives.

Oversees program and works in conjunction with agency and city departments, elected officials, business organizations, and other internal/external stakeholders.

Advises in the development of a communication plan and related program status reports for key stakeholders and provides updates on project activities and information on risks and mitigation strategies.

Communicate and engage with major stakeholders, i.e., city council, city divisions, community, etc. through the entire life cycle of the program ensuring seamless stakeholder/customer operations, including generation of regular reports on program status, performance metrics, and milestones resulting in clear understanding of program requirements and progress.

Establishes quality standards for program deliverables and ensure adherence to relevant regulations, codes, and standards; as well as implement a continuous improvement framework to enhance program processes and outcomes.

Advises on risk management, project delivery approaches, project acceleration alternatives, project prioritization, and other areas such as: project management, engineering, communications, pre-construction management and planning, and quality assurance/quality control (QA/QC).

Performs other related duties as assigned.

Employees may be re-deployed to work in other capacities in their own agencies or in other City agencies to support core functions of the City during a City-wide emergency declared by the Mayor.

Any one position may not include all the duties listed. However, the allocation of positions will be determined by the amount of time spent in performing the essential duties listed above.

Competencies

Critical Thinking — Using logic and reasoning to identify the strengths and weaknesses of alternative solutions, conclusions, or approaches to problems.

Deciding and Initiating Action - Takes responsibility for actions, projects, and people; makes quick, clear decisions which may include tough choices, after considering risks.
