General Statement of Duties

Performs intermediate level professional work performing business process analysis and design to support on line
of business applications throughout the City. Documents the functional business requirements of an assigned
business area. Responsible for implementing mission and business critical applications and services for the
agencies supported.

Distinguishing Characteristics

The IT Business Analyst Associate is distinguished from the IT Business Analyst Senior that performs full
performance level professional work as a liaison between business users, functional subject matter experts,
systems analysts and technical developers. Typical responsibilities include working with the business to analyze
processes (assessing current state and future state process flows), documenting process diagrams, requirements
engineering (business, stakeholder, solution and transition requirements), performing system fit/gap analysis,
providing input for design specifications, developing and overseeing request for proposals where technology is
involved and participation in systems testing.

The IT Business Analyst Associate is distinguished from the IT Quality Assurance Analyst Associate that performs
standard or intermediate level professional work supporting the planning, design and execution of various types of
testing on simple to complex implementations. Working collaboratively within the IT department developers,
project managers, and business analysts as well as with agency partners to execute and validate test cases based
upon system requirements.

The IT Business Analyst Associate is distinguished from the IT Systems Analyst Associate that performs standard or
intermediate level professional work analyzing, refining and documenting the business requirements of City
department and agency customers included in the development, implementation and production of integrated
technology software systems. Creates functional and technical specifications for systems to meet business
requirements, while ensuring the integrity of the technical design process. Serves as an authoritative technical
resource on specific business requirements and information needs of assigned customer departments and
agencies in any phase of the application and system development life cycles.

Essential Duties

Performs requirements gathering, functional decomposition, workflow analysis and logical design tasks.
Identifies business application and integrated technology opportunities and solutions for resolving business
problems.

Elicits and documents non-functional requirements, where appropriate.

Advises customers on best practices, application customizations and interface strategies.

Serves as a customer liaison for technology services.

May perform project leadwork.

Performs other related duties as assigned.

Employees may be re-deployed to work in other capacities in their own agencies or in other City agencies to
support core functions of the City during a City-wide emergency declared by the Mayor.
Any one position may not include all of the duties listed. However, the allocation of positions will be determined by the amount of time spent in performing the essential duties listed above.

**Competencies**

Customer Service - Interacts with customers in a friendly and professional manner, works to resolve issues quickly and effectively, and is knowledgeable about products and services.

Reading - Understands and interprets written material, including technical material, rules, regulations, instructions, reports, charts, graphs, or tables; applies what is learned from written material to specific situations.

Reasoning - Identifies rules, principles, or relationships that explain facts, data, or other information; analyzes information and makes correct inferences or draws accurate conclusions.

Technical Competence – Uses knowledge that is acquired through formal training or extensive on-the-job experience to perform one's job; works with, understands, and evaluates technical information related to the job; advises others on technical issues.

Technical Problem Solving - Troubleshoots, diagnoses, analyzes, and identifies system malfunctions to determine the source and cause of the problem.

Working with People - Shows respect for the views and contributions of other team members. Shows empathy, listens, supports, and cares for others, and reconciles conflict.

Written Communication - Composes, reviews, edits, and issues written materials for diverse audiences and communicates purpose in a succinct and organized manner that is appropriate for context, time, and place.
