

Mesh Liners for Carton Recycling

Mesh liners are used . This new way of collecting :

-
- M
- Reduce the smell and contamination of multiple carts.
- Usually rinsing and keeping the barrel clean much easier than cleaning multiple 95-gallon purple carts.
- Reduce the use of plastic bags.

DAILY USE

- Post (PURPLE) signage on the barrel so students know where recycling needs to go!
- Mesh liners are placed in the barrels
- There is a strap that can be tightened to hold the liner in place.
- Once the liner is full, it will need to be emptied into a designated cart outside in a storage area (by facilities staff OR students).
- Liners reused throughout the lunch period.
-

CLEANING

- The liner will need to be rinsed clean to remove milk residue.
- k can be done in a service sink
- u to dry overnight
- The bags can be
